

## Case Study #19

**Client Category:** Major Oil Company

**Location:** Texas, U.S.A.

**Physical Description:** A 30,000 gallon pond with oil contamination of 971 ppm (mg/L).

**Custom Treatment:** A daily dosage of **Custom HC** was applied directly to the surface of the pond. A total of one 55 gallon drum was used. Nutrients were added and two 3HP (three horsepower), two inch diameter pumps were installed to continuously circulate the pond contents for the purpose of aeration.

**Custom Results:** The following results occurred within 30 days:

DAY	TPH
0	971
14	23
29	4
	mg/L
